

DESCRIPTION:

1W 3KVDC Isolated Single Output DC/DC Converters

The PPR-1W series are miniature, isolated 1W DC/DC converters in a SIP package. They offer the ideal solution in many space critical applications for board level power distribution. The internal SMD construction makes it possible to offer a product with high performance at low cost. The series offers smaller size, improved efficiency, lower output ripple noise and 3KVDC isolation.

DESIGN REFERENCE

Typical application circuit

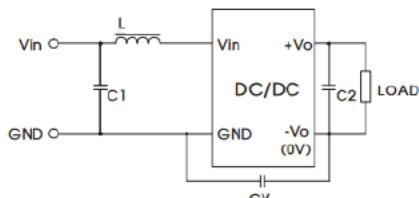

If it is required to further reduce input and output ripple, a filter capacitor may be connected to the input and output terminals, see Fig.1 Moreover, choosing a suitable filter capacitor is very important, start-up problems may be caused if the capacitance is too large. Under the condition of safe and reliable operation, the recommended capacitive load values are shown in Table 1.

Recommended capacitive load value table (Table 1)

Vin (VDC)	Cin (μF)	single Vout (VDC)	Cout (μF)
3.3/5	4.7	3.3/5	10
9/12	2.2	9/12	2.2
15	2.2	15/24	1
24	1	--	--
